Pisces Download Instructions

NOTE - IMPORTANT

1. The Pisces Predicted Log Event Program must already be installed (Setup) on your computer before any downloads can be done.
2. A Pisces (Setup) CD is available from the Club if you don't have one.
3. Open the Pisces CD 'ReadMe' text file for the install instructions. If installing to the Vista or w7 Operating Systems, special actions are required as detailed in the Pisces CD 'ReadMe'.
4. The CD may or may not contain the latest program/course data. If not, download the latest as detailed below.

---

Webpage Download Upgrades & Updates

A. General:

Webpage download upgrades/updates may exist for the Program+Help files and/or for Course Data.

B. Pisces Program Upgrade:

Only upgrade the Pisces Program files if the download version number is different (ie. later) than what you have. Your existing version number is shown on the start up window when Pisces is run.

C. Course Updates:

Course data updates may occur for the SEASON or for PARTICULAR courses.

1. A SEASON courses update is only done once each season. Course changes during a season (or a new course) are done as separate downloads.
2. A season or course data update does NOT affect existing Run Sheets. IMPORTANT: Existing Run Sheets may need to be edited to match updated courses. Note that Turning Point & GPS Run Sheets can be rebuilt from the Pisces [RUN SHEET] menu at any time, but rebuilds obliterate any manual changes already made.

D. Download Files:

Download upgrades/updates are contained in PowerZip self extracting zip files and when unzipped, replace existing files and/or add new files.

E. TO DOWNLOAD:-

1. Make sure Pisces is not open (running).
2. Open the download item (click).
3. To reach the unzip phase:-  
For the XP Operating System, click 'Run' (twice) when displayed.  
For Vista/w7, click 'Run' and after the security check, click the 'Actions' & 'Run Anyway' prompts.  
NOTE:- If when prompted, 'Save' is clicked instead of 'Run', the zip file will need to be unzipped from the folder saved to.
4. Click the PowerZip 'Start' button when displayed to unzip. The default target path will be either 'c:\pisces' or 'c:\pisces\data' - accept.
5. Run Pisces as normal. If the SEASON courses have been updated, accept any prompts which may appear.
